

IMPACT DIMENSION	IMPACT INDICATOR	PERFORMANCE	RATIONALE
<b>Life on Planet &amp; Natural Resources</b>			
Climate Change	Product Carbon Footprint (PCF)	<span style="color: #f08080;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #90ee90;">●</span>	Under assessment (est. 5 - 8 kg CO <sub>2</sub> eq./kg product at store)
Biodiversity Loss	Loss of biodiversity & biosphere integrity	<span style="color: #ff0000;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #90ee90;">●</span>	Safe target stock / high bycatch of endangered species (ETP)
Habitat Degradation	Destruction of Vulnerable Marine Ecosystems (VMEs)	<span style="color: #f08080;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #008000;">●</span>	No seafloor interaction, no critical damage of VMEs
Freshwater Depletion	Risk of freshwater depletion	<span style="color: #f08080;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #008000;">●</span>	No freshwater use
Eutrophication	Discharge of nitrogen (N) and phosphorous (P)	<span style="color: #f08080;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #008000;">●</span>	No use and discharge of N-P compounds
Toxic Compounds	Pollution with toxic chemicals and pesticides	<span style="color: #f08080;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #008000;">●</span>	No use and discharge of toxic compounds
<b>People &amp; Coastal Communities</b>			
Human Rights	Human rights & decent work conditions	<span style="color: #ff0000;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #90ee90;">●</span>	Moderate to high risk in offshore industrial fleets
Workers' Safety	Exposure to health & safety hazards	<span style="color: #f08080;">●</span> <span style="color: #ff0000;">●</span> <span style="color: #90ee90;">●</span>	Moderate safety at sea and in processing factories
Community Inclusiveness	Fair value chain participation by communities	<span style="color: #ff0000;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #90ee90;">●</span>	No inclusiveness of communities (industrial fishery)
<b>Animal Welfare</b>			
Living Conditions	Natural behaviour during lifetime	<span style="color: #f08080;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #008000;">●</span>	Life in the wild, no husbandry systems
Physical Stress	Stress & physical damage during or after capture	<span style="color: #f08080;">●</span> <span style="color: #ff0000;">●</span> <span style="color: #90ee90;">●</span>	Long soak time on the hook, fast hauling and slaughter
Humane Slaughter	Pain & suffering during slaughter	<span style="color: #f08080;">●</span> <span style="color: #ffd700;">●</span> <span style="color: #008000;">●</span>	Stunning and relatively fast slaughter process

## BLUEYOU OCEAN IMPACT TRACKER

## METHODOLOGY FOR ASSESSMENT AND SCORING GUIDEPOST

## WILD CAUGHT SEAFOOD

Version 1.0 Oct 2023

Assessment Date:	November 20 2023	Species Name	Bigeye Tuna		
Assessor Name:	Fabian Mollet	Country of Origin	Federated States of Micronesia		
Unit of Origin Code:		Catch & Harvesting Area	Western Central Pacific		
		Origin Type	Wild Capture Fisheries		
		Farming / Fishing Method	Pelagic Longline (EU: LD)		
		Operation Type	Industrial offshore fishery		
<b>LIFE ON PLANET &amp; NATURAL RESOURCES</b>					
Impact Dimension	Parameter for Evaluation	Assesment Indicators and Metrics	Scoring Guidepost	Score	Comments and Remarks for Assessment
			1. Negative impact / Critical performance	2 Moderate impact / Acceptable performance	3 Positive impact / Good performance
Climate Change Impact	LCA-based carbon footprint	Carbon Footprint in Kg CO <sub>2</sub> eq. / kg final product on POS in market	High footprint [ > 8.0 kg CO <sub>2</sub> eq./kg product at store]	Moderate footprint [3.0 - 8.0 kg CO <sub>2</sub> eq./kg product at store]	Low footprint [ < 3.0 kg CO <sub>2</sub> eq./kg product at store]
Ecosystems & Biodiversity	Biosphere integrity and biodiversity loss	Biodiversity loss, ETP impact, overexploitation	Critical biodiversity loss OR significant mortality of ETP species, threatening ecosystem integrity OR stocks overexploited through fishery under assessment	Moderate risk for biodiversity loss, marginal mortality of ETP species, low risk of ecosystem integrity change, no overexploitation by the fishery	No risk for biodiversity loss, negligible mortality of ETP species, no risk of ecosystem integrity change, no overexploitation for any of the affected species
Habitat Degradation	Habitat system change due fishing gear impact	Destructiveness of fishing gear versus sensitivity of habitat	Irreversible damage and long term degradation to sensitive habitats	Moderate gear-seafloor interaction, not highly sensitive habitat, causing some damage that is reversible	No gear-seafloor interaction
Freshwater Use	Depletion of freshwater	Use of freshwater and risk of depletion (feed and farming)	High consumption and critical risk for depletion	Moderate consumption / freshwater no depletion risk	No use of freshwater
Eutrophication	Discharge of critical nutrients (N,P)	Risk of eutrophication in feed production and aquaculture	High risk (agriculture and aquaculture)	Moderate risk	Low / No Risk
Toxic Compounds	Pollution with chemicals and pesticides	Use of chemicals, pesticides, antibiotics and toxic compounds	Frequent and continuous use as part of SOP	Moderate and occasional use under GAP	No use as part of SOP
<b>PEOPLE &amp; COASTAL COMMUNITIES</b>					
Human Rights & Work Conditions	Human rights and decent work conditions	Risk for human right abuse and critical work conditions (fishing and processing)	High risk	Moderate risk	Low risk
Workers' Safety	Safe working conditons along supply chain	Risk for critical working conditions on fishery fleet and processing level	High risk	Moderate risk	Low risk
Community Inclusiveness	Fair value and participation of communities	Level of involvement of local community in fishing operation and value chain	No / Low	Moderate	High
<b>ANIMAL WELFARE</b>					
Living Conditions & Quality of Life	Husbandry system which respects natural behaviour	Husbandry systems,species appropriate stocking densities, natural environment	n.a.	n.a.	Default selector for wild caught seafood systems (species live in their natural, wild environment)
Capture, Harvesting & Handling	Reducing stress during harvesting & handling	Risk of exposure to prolonged stress, pain and injuries	High risk for prolonged stress during catch, pain and multiple injuries, high by-catch rates, risk for ghost gear mortalities	Moderate exposure to stress, improved handling and quick process of catch and handling	Optimized handling to reduce stress to minimum
Stunning & Humane Slaughter	Stunning before slaughtering	Objective: Vertebrate and Decapod Crustacean are stunned prior to killing	No stunning and prolonged suffering prior to death	No stunning but moderate risk for prolonged suffering	Effective stunning in place within minimal time between stunning and slaughter
